

Table of Contents

1. Introduction

1.1	Definitions	1
1.2	The Problem and the Need to Reduce Waste	1
1.3	Sources of Construction and Demolition Waste	3
1.4	Constituents of Construction and Demolition Waste	4
1.5	Forecast of Construction and Demolition Waste Arising	5
1.6	The Waste Reduction Framework Plan	6
1.7	The Waste Management Hierarchy	7
1.8	Waste Minimization Techniques	8
1.9	Objectives of This Guidebook	9

2. Minimising and Managing Demolition Waste

2.1	Demolition Waste	11
2.2	Demolition Methods	11
2.3	Selective Demolition	14
2.4	On-site Sorting of Demolition Waste	16
2.5	Alternative Uses of Demolition Materials	17

3. Minimising and Managing Building Waste – Good Management and Operating Practices

3.1	Causes of Building Waste on Site	18
3.2	Estimation and Auditing of Building Waste Generated from the Construction of New Buildings	20
3.3	Reduction of Materials Wastage	28
3.4	Waste Management Plan	35
3.5	Role of Site Waste Manager	37
3.6	Managing Subcontractor	38
3.7	Sorting and Separation of Building Waste	39
3.8	Trip Ticket System	41
3.9	Relevant Government's Practice Notes and Technical Circulars on C&D Waste Management	42

Table of Contents (Cont'd)

4. Minimising and Managing Building Waste – Low Waste Building Technologies	
4.1 Current State of Building Technology	45
4.2 Major Waste Producing Processes on Building Sites	46
4.3 Low Waste Building Technologies	46
4.4 Comparison of Traditional Construction Methods and Low Waste Technologies	62
4.5 Case Studies	65
4.5.1 Tseung Kwan O Area 74 Phase 4	65
4.5.2 Tung Chung Development Package II Project	72
4.5.3 The Centre, 99 Queen's Road Central	77
5. Minimising and Managing Building Waste at the Design Stage	
5.1 Waste Arising from Design	79
5.2 Design Considerations	80
5.3 Designer's Checklist	83
